Upcoming installation works in your area

Victoria Street water main renewal project

To provide a reliable water supply now and into the future, Greater Western Water is installing a new, larger water distribution main network along Victoria Street. These works are essential to replace 3.5 kilometres of 140-year-old water mains with the project being delivered for Greater Western Water by **Jaydo Construction**.

What we are doing and when

We are performing installation works along the **eastern side of Rathdowne Street** in the intersection of **Queensberry and Rathdowne streets**.

These installation works will involve saw cutting, installing a new section of pipe and reinstatement of the work zone once all works have been completed. Your water and sewerage services will not be impacted.

These works will take place from **Sunday 21 to Thursday 25 January 2024 between 8pm and 5am**.

Location of the works

Work location with traffic management and detours in place to help you safely move around the area.

What to expect

While we will continue make every effort to minimise disruption and inconvenience to you, the following can be expected:

- Noise and dust from saw cutting during working hours.
- Working zones will be set up to keep workers and the community safe.
- Parking spaces near work zones may be occupied during working hours.
- Increased truck movements throughout the area in the day and night.
- Steel road plates will be used to cover excavations outside of construction hours, the road will be reinstated as works are completed.

Changes to traffic, transport and parking

Please plan ahead as there will be changes to how vehicles and cyclists move around on Rathdowne Street during construction hours, which includes:

- Temporary closure of some parking spaces in the southbound lane of Rathdowne Street.
- Full closure of southbound lanes on Rathdowne Street between the intersections of Queensberry Street and Victoria Street during construction hours.
- Temporary closure of the initial section of the bike lane during construction hours.

Traffic management teams will be in the area to assist with detours and pedestrian access and to facilitate business deliveries/pick-ups and access to driveways where possible.

Why we're working at night

It's necessary to carry out these works at night to minimise disruption to traffic, tram and bus services, and businesses along Victoria Street. Where possible we will perform the noisiest work at the start of our construction hours. Please note that unavoidable noise associated with construction will still occur throughout the night
