Upcoming works in your area – Peel Street to William Street

Victoria Street Water Main Renewal Project

To provide a reliable water supply now and into the future, Greater Western Water is installing a new, larger water main along Victoria Street. These works are essential to replace 3.5km of 140-year-old water mains, with the project being delivered by Jaydo Construction.

What we are doing and when

Works are about to begin on the existing water main in the southern side of Victoria Street. The old cast-iron water main will be removed and replaced in five sections, with separate works at major intersections.

Investigative works will be completed from **Sunday 14 January** for one week between **8pm and 6am, Sunday to Thursday**.

The **main pipe replacement works** will begin in **February 2024**, taking around 4 weeks to complete. These will be night works between **8pm and 6am, Sunday to Thursday**. Additional information will be provided before these works begin.

We will notify you in advance if work outside these hours is required or dates change.

Location of the works

The work will take place on the **southern side of Victoria Street, between the intersections of Peel and William streets**, and in the intersection of William Street. Works will take place in the westbound lane, with traffic management and detours in place to help vehicles and pedestrians safely move around the area.

 Location of work zones, with detours in place around these areas during construction hours

What to expect

While we will continue make every effort to minimise disruption and inconvenience to you, the following can be expected:

- During investigative works, short periods of noisy digging will take place.
- During the pipe replacement, there will be large excavation work with fencing and barricades to keep you safe.
- Dust and lights from machinery and vehicles during construction hours.
- Storage of equipment and materials in nearby clearways and side streets in the day
- Increased truck movements throughout the area in the day and night.
- Steel road plates will be used to cover excavations outside of construction hours, the road will be reinstated as works are completed.

Changes to traffic and parking

There will be changes to how vehicles and cyclists move on the southern side of Victoria Street between 8pm to 6am, which includes:

- A full closure of westbound lanes between Peel and William streets, with detours in place via Peel Street. Victoria Street will reopen during the day.
- Temporary closure of nearby clearways and parking spaces in side streets near work zones at all times to store equipment required for the work.
- No impact to public transport.

Traffic management teams will be in the area during construction hours to assist with detours, pedestrian access and to facilitate local access and business delivery needs where possible. Please plan ahead as these changes may result in delays.

Why we're working at night

It's necessary to carry out these works at night to minimise disruption to traffic, tram and bus services, and businesses along Victoria Street. Where possible we will perform the noisiest work at the start of our construction hours. Please note that unavoidable noise associated with construction will still occur throughout the night.
