

19 March 2024

Change of date of upcoming works – Therry St intersection

Victoria Street Water Main Renewal Project

To provide a reliable water supply now and into the future, Greater Western Water is installing a new, larger water main along Victoria Street. These works are essential to replace 3.5km of 140-year-old water mains, with the project being delivered by Jaydo Construction.

What we are doing and when

The start date for night works to perform repairs at the intersection of Therry Street has been delayed, with works now taking place on:

Date: Sunday 24 March, for three nights

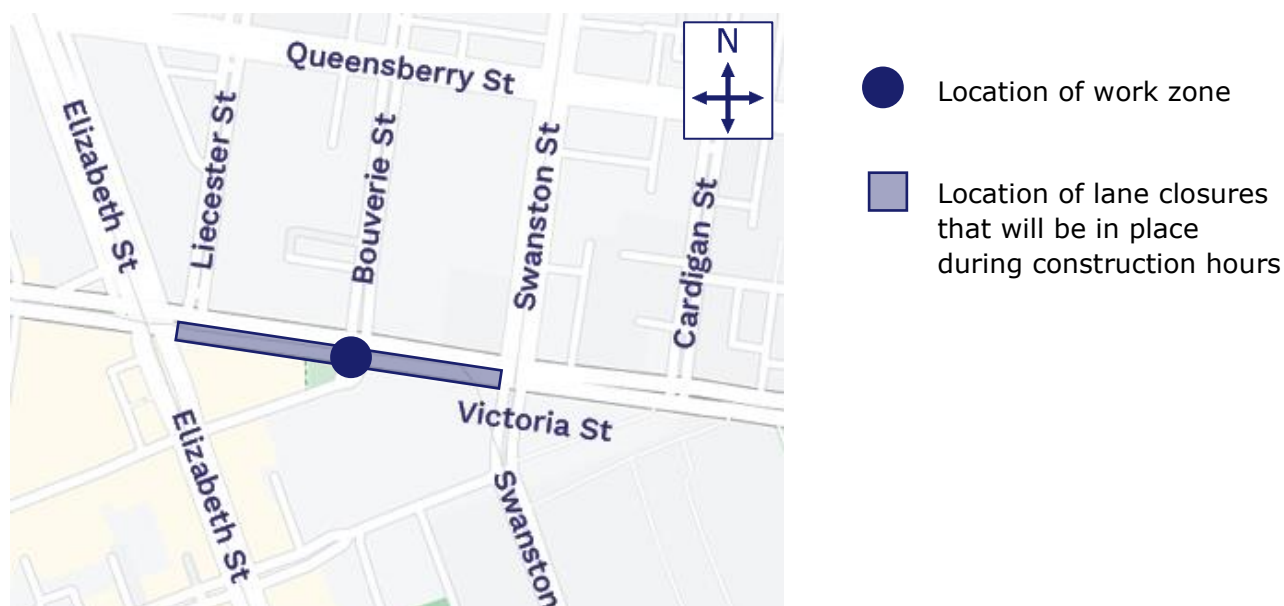

Time: between 8pm and 6am, Sunday to Thursday

Location: on the southern side of Victoria Street at the intersection of Therry Street

It's necessary to carry out these works at night to minimise disruption to traffic and bus services on Victoria Street. We will do our best to manage noise levels and where possible we will perform our noisiest works at the start of construction hours. Please note that unavoidable noise associated with construction will still occur throughout the night.

Location of the works

Works will take place on the **southern side of Victoria Street** in the intersection of **Therry Street**. Traffic management and detours will be in place to help vehicles, pedestrians and cyclists move around the area. See overleaf for more information.

What to expect

While we will make every effort to minimise disruption and inconvenience to you, the following can be expected:

- Excavation works with fencing, barricades and trench covers to keep you safe.
- Noise, dust and lights from machinery and vehicles during construction hours.
- Storage of equipment in nearby car parking spaces in side streets during the day.
- The use of steel road plates to cover excavated areas during the day.

Changes to traffic, transport and parking

Please plan ahead as there will be changes to how vehicles and cyclists move on the southern side of Victoria Street, which includes:

- A full closure of the southern side of Victoria Street between the intersections of Swanston Street and Elizabeth Street will be in place during construction hours. Detours will be in place via Swanston Street for westbound traffic.
- No access into Therry Street from Victoria Street and no access out of Therry Street onto Victoria Street during construction hours. Vehicles will be able to enter Therry Street via Queen Street and leave Therry Street via Elizabeth Street.
- No impact to nearby public transport services, but please be mindful of changed traffic conditions while walking in the area.
- The closure of the nearby parking spaces in side streets to store equipment required for these works.

Traffic management teams will be in the area during construction hours to help with detours and pedestrian movements, and to facilitate local access needs and business deliveries/pick-ups where possible. Fencing, barricades and flagging will be in place to keep pedestrians safe.

Please plan ahead as these changes may result in delays.
